

Custom Modifications

If You Can Imagine It, We Can Make It Happen.

Full Tilt has been doing custom projects since the beginning, no matter the request. Want your grilles and decals color matched? Rims to match your paint color? Tired of your chrome accent pieces? Let us know what you envision and we'll make it a reality.

Our Custom Mods Process:

1. Discuss your project and desired outcome
2. Select your color scheme and sheen level
3. Components are removed from vehicle and prepped for mods
4. Modifications are completed to your exact specifications
5. Components are reinstalled and inspected for perfect alignment
