

Auto Detailing & Recondition

A Clean Car Demands Respect.

Full Tilt has been voted Best of The Valley in Auto Detailing since 2013. We take the finishing touches as seriously as all of our structural work. We know that nothing feels better than stepping into your car when it looks like it just rolled off the dealership lot.

Our Detailing Process:

1. Vehicle is pre-washed with hot, soapy water to gently remove dirt
2. Clay bar applied to remove all tree sap, road grime and insect gunk
3. Vehicle is dried and analyzed for chips, nicks and scratches
4. 3-step buffing process removes any impurities in the paint finish
5. Thick layer of carnauba wax or paint protectant is applied
6. Mats and seats are removed from interior (if necessary)
7. Surfaces and crevices are thoroughly cleaned and vacuumed
8. Cloth surfaces are steam cleaned, including headliner and carpet
9. Leather or vinyl surfaces are cleaned and conditioned
